

URBAN & PUBLIC TRANSPORT

We optimise transport systems to move cities efficiently.

setec develops metro, tramway, BRT and multimodal transport systems that make cities more accessible, sustainable and connected. From planning and design to commissioning, we support transport authorities in delivering reliable, high-capacity mobility solutions that improve everyday urban life.

GRAND PARIS EXPRESS (France)

A 200 km automatic metro network with 68 new stations: one of Europe's largest urban mobility programmes.

CASABLANCA BRT / BHNS (Morocco)

Lines L5 and L6, ~25 km in service since 2024, with setec as prime contractor for studies and works.

ÎLE-DE-FRANCE TRAMWAY NETWORK & TRAMWAY T9 (France)

A leading player since the early 2000s: urban development, design and works supervision of structures and systems.

MONTREAL METROPOLITAN EXPRESS - REM (Canada)

Automated light rail, 26 stations over 67 km (Phase 1): design and construction supervision, testing and commissioning.

BOGOTA METRO L1 PMO (Colombia)

MARSEILLE BHNS (France)
